Rise Gets Wasted

2019 Trash Audit

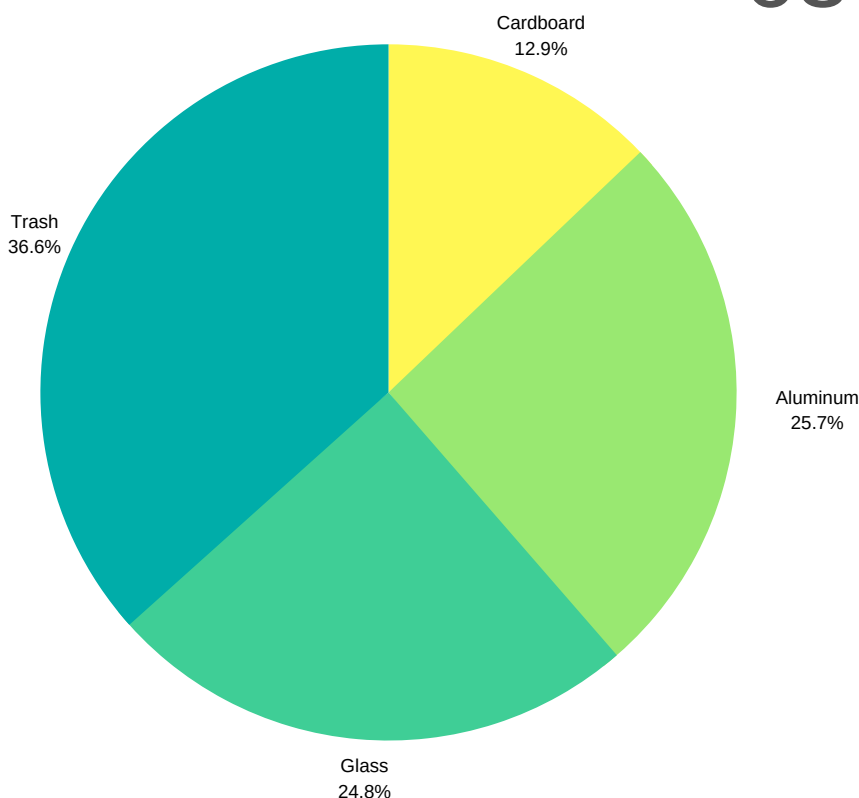

Reducing waste is the most important step in waste management. Rise is committed to, and are actively working to reduce its waste on a daily basis.

At the start of each calendar year, a waste audit is conducted to determine how much waste Rise is currently producing, and targets are set to reduce that amount by 25% by the end of the year.

The purpose of the audit is to:

1. identify and measure the composition of waste
2. help to set specific targets for waste reduction
3. assist with the prioritization of waste reduction

January 2019 Results

63% of our waste escaped the landfill!

Trash was mainly composed of compostable material (coffee grounds, food scraps), take-out bags and coffee cups.

2019 Target

Reduce trash by **20%** - achieve by finding local compost collection service and encouraging staff to use reusable mugs for coffee.
